

O₂ Business USB Modem

(GPRS/3G/EDGE/HSDPA)

If your business wants to make more effective use of its laptops, why not truly mobilise them with the O2 Business USB Modem manufactured by Sierra Wireless. You'll get access to your email, the Internet and your company LAN¹ when you're on the move.

With download speeds of up to 1.8MB per second² on HSDPA you can keep on top of your work, stay in touch with your customers, colleagues and suppliers and get access to the information that's important to you.

With an O2 Business USB Modem you can work at your desk on a Desktop PC or laptop as well as away from the office using a laptop². You can choose a tariff with a data allowance or alternatively one of our Unlimited or data Bolt Ons.

Why O2 Business USB Modem?

- Compact and stylish
- Plug and play, works straight from the box
- Watcher Software – widely recognised by businesses as easy to use and intuitive
- TRU Install – providing plug-and-play installation
- Manufactured by Sierra Wireless a leader in innovative wireless solutions
- Advanced power control reduces battery drain on laptops and optimises modem performance
- MicroSD slot – no need for a separate memory stick.

Our O2 Business USB Modem gives you the added advantage of faster access to your email, company intranet and Internet when you use the HSDPA service.

The speed of your connection is affected by several factors, including coverage, other users and which O2 network you're connected to.

O2's Business USB Modem will provide ultra high speed access when you're within HSDPA coverage, outside this area you will automatically operate on 3G/GPRS speeds.
