

Using BlackBerry Abroad

There are a couple of options that you can choose from when you wish to use your BlackBerry abroad. Bolt on's are available which can help reduce the costs if you are going abroad on a regular basis or for a longer period of time.

The International options vary dependant on the BlackBerry tariff you use:

BlackBerry Enterprise Solution

Option 1

Pay £20 per month for each BlackBerry® handheld. This pays for all BlackBerry data usage and applies each month whether a customer roams abroad or not. This is beneficial if you use BlackBerry abroad for more than four days each month.

Option 2

A charge of £5.00 for each day the BlackBerry is in use while abroad regardless of where you are visiting.

Option 3

A charge of £2.55 per MB in EU/Europe and £6.00 per MB everywhere else overseas

All BlackBerry (BES) users will be automatically activated with Option 2. Excluding users with the Unlimited Mobile Web tariff option.

You can transfer between options once in any three month period.

BlackBerry Internet Solution (BIS) Unlimited

Option 1

A charge of £6.00 per MB when using your BlackBerry overseas applies.

Option 2

A Monthly subscription of £20 per user to cover all BlackBerry data usage. This charge applies whether the user roams abroad or not in the month.

BIS Pay as You Use

Pay £7.20 per MB when using the BlackBerry overseas.

BES Express

The International bolt on required will depend on the variant of BES Express. For the BIS variant the BIS International bolt on's will apply and for the BES variant the BES International bolt on's will apply.
